

SKU: S60-137

S6.0 Vibratory Step Presenter

An electrically motorized 6" (152mm) step presenter suitable for feeding or presenting fasteners to a drive head or dispenser assembly.

Anatomy & Features

The S6.0 Series of step presenters comes complete with hardened tool steel and stainless steel escapement. Optic controls switch the bowl vibration on and off to prevent excessive wear and over-pressurization of escapement and tooling areas as seen on other manufacturer's systems.

Featuring an electrically motorized screw elevator assembly which lifts fasteners from the tray into the inline track, step feeders are a more silent option for feeding fasteners. The low vibration also helps to reduce the uneven coating distribution of fasteners coated with loctite or other substrates that is sometimes seen in vibratory bowl feeding.

- ✓ Resistant to wear & tear damage
- ✓ Non-magnetic nickel-teflon coating
- ✓ Ideal method for silently feeding/presenting coated fasteners
- ✓ 3-Step fastener alignment verification prevents jams
- ✓ Hardened & heat-treated durable tool steel composition
- ✓ Longer run time between feeds due to less track level fastener jams
- ✓ Less pinch points & no mechanical adjustments for enhanced safety

Product Technical Data

Step Size	6.0" (152mm)
Fastener Delivery Method	Presenter Pickup
Max. Fastener Head Ø	19mm
Max. Fastener Length	76mm
Max. Fastener Shaft Ø	8mm
Fastener Type	Screw, Set Screw, Nut, Bolt, Pin, Stud, Rivet
